PROFESSIONAL SUMMARY

Data Analyst (2026 Batch) with hands-on experience in Python, SQL, and automation-driven workflows. Skilled in building data pipelines, analytical reporting, and AI-powered automation using tools such as LLM Applications, Prompt Engineering, RAG Systems, Vector Databases API Integrations. Experienced in MIS reporting, data storytelling, and cross-functional collaboration through internships and academic projects. Familiar with Power BI/Tableau for dashboarding and adept at translating large datasets into actionable business insights. Strong foundation in Machine Learning, MLOps, and GenAI integrations with a quality-focused, deadline-driven approach.

CORE COMPETENCIES

Data Analysis & MIS: SQL (Advanced Queries, Aggregations, Joins), Python (Pandas, NumPy, Matplotlib, Seaborn), Excel (Advanced)

Dashboarding & Visualization: Power BI, Tableau, Matplotlib, Seaborn, Data Storytelling

Automation & AI Tools: Python Scripting, CI/CD Pipelines, Claude AI, Gemini, GenAI Platforms, FastAPI

Databases: SQL, MongoDB, Data Extraction & Transformation (ETL)

ML & Analytics: Machine Learning Fundamentals, RAG Pipelines, Predictive Analytics, FAISS, PyTorch, Hugging Face

Dev & Collaboration: Git, Version Control, REST APIs, SDLC, Documentation, Agile/Cross-functional Teams

EXPERIENCE

RDE Automation & Data Tools Intern | [Autoliv](#) | [AeroSpace Park, Bengaluru](#) | Aug 2025 - Nov 2025

- Automated reporting workflows using Python, reducing manual reporting effort by 60% and improving validation accuracy.
- Analyzed system logs and structured data in Linux environments to identify operational gaps and generate actionable performance insights.
- Developed 10+ automation scripts for ETL and reporting processes, reducing processing time by 40%.
- Collaborated with cross-functional engineering teams to improve deployment workflows and internal tool reliability.
- Followed SDLC documentation standards to ensure process consistency and traceability across development cycles.

Software Development Intern (Incubator) | [Osmania University](#) | Aug 2023 - Feb 2024

- Engineered a cross-platform mobile application using Flutter with intuitive UI components, contributing to full-cycle feature development.
- Enhanced user experience through design implementation and functional contributions, practicing agile development and team collaboration.

PROJECTS ([Github](#))

Domain-Specific Language Model (RAG) for Medical Tests

- Built a Python-based automated data ingestion and retrieval pipeline using FAISS vector search, enabling domain-specific AI-driven Q&A on medical datasets.
- Focused on system reliability, dependency management, and repeatable execution, mirroring MIS automation workflow principles.
- Tools: Python, Hugging Face, FAISS, PyTorch, demonstrating hands-on ML and data pipeline experience.

Fine-Tuning LLMs — Multi-Option Workflow Automation

- Developed script-driven workflows to handle structured datasets for LLM fine-tuning, managing execution environments, libraries, and experiment pipelines.
- Demonstrated ability to automate analytical workflows and manage large scale data handling directly applicable to business analytics and reporting automation.

Personalized Recommender System for Stock Analysis

- Implemented a data processing and analysis pipeline using Python, automating data handling and result visualization for stock trend analysis.
- Applied statistical and ML concepts to generate personalized insights, building foundational experience in predictive analytics and business.

EDUCATION

B.Tech – Computer Science (AI & Machine Learning)

CMR University, Bengaluru | 2022–2026 | CGPA: 8.82

CERTIFICATIONS

- Python Programming - Great Learning
- Java Programming - Great Learning
- DevOps Fundamentals - CI/CD & Git - Udemy
- Software Development Training - Academic Program

SOFT SKILLS

Analytical Problem-Solving, Data Storytelling, Cross-functional Collaboration, Adaptability, Detail-Oriented, Time Management, Independent Working, Stakeholder Communication
