8088817221 | akshayjamnis29@gmail.com | <https://www.linkedin.com/in/akshayjamnis49/> | <https://akshayjamnis.github.io/AkshayJamnis/> | Bengaluru | <https://github.com/akshayjamnis>

Professional Summary

Engineer with a strong foundation in **Python scripting, Linux OS, cloud fundamentals, and CI/CD workflows**. Hands-on experience supporting **automation tasks, system validation, deployment pipelines, and application reliability** through internships and academic projects. Proficient in **cloud platforms, version control, networking fundamentals, and REST-based systems**. A proactive learner with strong documentation, troubleshooting, and collaboration skills, eager to contribute to enterprise-scale IT infrastructure operations. Internship experiences in software development and AI-based applications have strengthened Automation, problem-solving, adaptability, and teamwork skills.

Experience

RDE Automation Tools Intern

Autoliv | [AeroSpace park](#) | 14 Aug 2025 – 14 Nov 2025

- Assisted in automation and system support tasks involving data pipelines and internal tools.
- Worked in Linux-based environments to validate system outputs and application behaviour
- Collaborated with engineers to troubleshoot issues, analyse logs, and improve system reliability.
- Followed documented workflows and SOPs, contributing to process improvements.
- Gained exposure to enterprise IT practices, system monitoring concepts, and deployment workflows.

Incubator

Osmania University | 1 Aug 2023 – 2 Feb 2024

- Engineered a cross-platform mobile application utilizing Flutter, incorporating highly intuitive user interface components.
- Significantly enhanced the user experience through meticulous design implementation and robust functional contributions.

Education

Bachelor in Technology-Computer Science (Artificial Intelligence and machine learning)

CMR University | [CMR University Engineering Block](#) | [2022-26]

Key Skills

Technical Skills:-

Programming & Scripting ➤ Python (automation, scripting, APIs) ➤ Bash (basic scripting) ➤ JavaScript (basic scripting) Networking & Systems ➤ TCP/IP, DNS, HTTP/HTTPS (fundamentals) ➤ REST APIs Databases & Tools ➤ SQL, MongoDB ➤ Monitoring concepts (logs, metrics – foundational)	Operating Systems & Infrastructure ➤ Linux/Unix (command-line basics, file systems, process handling) ➤ Windows environment basics Cloud & DevOps (Foundational) ➤ Cloud fundamentals: AWS / Azure (compute, storage, networking concepts) ➤ Git & GitHub (version control) ➤ CI/CD exposure (basic pipelines, Git workflows)
---	---

Soft Skills:-

- Teamwork, Adaptability, Detail-Oriented, Problem-Solving, Time Management.

Projects

Domain-Specific Language Model (RAG) -- <https://github.com/akshayjamnis/DomainSpecific.git>

- Built a Python-based automated pipeline for data ingestion, retrieval, and response generation.
- Focused on system reliability, repeatable execution, and dependency management.
- Tools: Python, Hugging Face, FAISS, PyTorch.

Fine-Tuning LLMs

- Developed script-driven workflows for handling structured datasets.
- Managed execution environments, libraries, and experiment pipelines.

Recommender System for Stock Analysis

- Implemented a data processing and analysis pipeline using Python.
- Automated data handling and result visualization.
